CHERYL FOWLIE

Test Engineer

👷 Profesional Summary

Lead Test Automation engineer, currently working on a small team with a dedicated platform within the media and entertainment industry. I am involved with a team of developers to write complex test scrips for all code written and deployed.

Since being with my current company I have taken our team from fully manual testing over all platforms to automation within a year. Not only do we now test over all new code features but across physical devices including PlayStation, Xbox, Smart TVs and Mobile devises.
